

## Case Study

### Shopping Areas

Exeloo automated public toilet facilities have been specified for a large number of shopping locations. In particular, the Exeloo Eurokit, which comes in a flat pack form and can be assembled inside another building, has been used in a number of shopping centres. Coles Supermarkets in Australia have been one company that has recognised the merits of the self cleaning, self contained public toilet facilities which have generally been placed in the entrance foyer or just outside the supermarket building.

Some of the locations where these units have been installed include:

- the Coles Southland Shopping Centre on the Nepean Highway in Melbourne,

- the Coles Store on the corner of Church and Victoria Streets in Hastings,

- the Coles Williamstown facility in Williamstown, Victoria

- and the Coles Supermarket in Hallam in Victoria.
