

EUROKIT

OUR WORLD FIRST DESIGN

Transform stale, antiquated public restrooms or bring a smart approach to new building projects

FAST FACTS

Arrives as a Kitset

The panelized kitset is supplied with all components pre-fitted. Simply lay the base frame on a level surface and assemble. Full assembly instructions are included.

No Set Down Required

The EUROKIT base frame is placed on a concrete subfloor that is level with the final exterior floor level. Internal falls and internal cubicle drains are incorporated into the design making site works easy.

Fast Assembly

Unique prefabricated kitset design minimizes disruption on-site and to the public.

After Sales Support

Our experts are just a phone call away. Exeloo also coordinates a broad network of service technicians ready to assist. See our website for a list of Exeloo approved technicians.

Built to Last

Our components are manufactured from high grade stainless steel and recessed into the wall space for industry leading resilience to vandalism and wear.

4 GREAT REASONS TO CHOOSE AN EXELOO EUROKIT

1 Preserve Community Heritage

The EUROKIT public restroom system transforms heritage sites into modern, fresh and highly serviceable public amenities. By extending a heritage assets life, the EUROKIT helps to preserve a communities link with its past.

2 Public Security

A consequence of outdated restroom designs can be anti-social loitering. EUROKITS transform older restrooms with auto-door features and other sensor technology to increase public safety and security.

3 Cost Saving

Avoid costly demolition and re-design costs. The EUROKIT is tailored to each space and designed to meet local disability codes. Unit commissioning takes just a few days avoiding unsightly site works, noise and public inconvenience.

4 Flexibility

EUROKITS are available in a simple manual configuration or fully optioned with intelligent features such as auto-wash, sensor operations and automated doors.

: INTERIOR FIT OUT FEATURES

Exeloo public restrooms can be configured to meet almost any budget or project requirement. Start with a **MANUAL**, **SEMI-AUTOMATED** or **FULLY-AUTOMATED** level specification and choose from our comprehensive list of fit out options to get the best match for your project needs. **Below are some examples of fit out options available.**
