

**TITAN**

## THE TITAN IS OUR PREMIUM CONCRETE SHELL MODEL

**A durable and timeless design that is built to last.**

### FAST FACTS

#### Arrives Fully Assembled

The concrete building is fully integrated with floor, walls and roof system already constructed. The interior is finished and the building is ready to be connected to strip foundations making site works quick and easy.

#### After Sales Support

Our experts are just a phone call away. Exeloo also coordinates a broad network of service technicians ready to assist. See our website for a list of Exeloo approved technicians.

#### Built to Last

The TITAN building is crafted from reinforced concrete and with accessory components manufactured from high grade stainless steel. Fit out options are recessed into the wall space for industry leading resilience to vandalism and wear.

### 4 GREAT REASONS TO CHOOSE AN EXELOO TITAN

- 1 Customise To Your Project Requirements**  
Our TITAN units can be configured as single or twin cubicle layouts and are modular with the system able to be extended side by side to increase capacity in higher volume locations.
- 2 Tailor Fit Out To Your Budget**  
Exeloo models can be customized to a basic MANUAL level fit out right through to a FULLY-AUTOMATED level specification that delivers a virtually touchless environment and a cubicle Auto-Wash feature.
- 3 Relocatable**  
A fully integrated modular construction system means that the unit can be disconnected from services and relocated if needed. This preserves the asset investment minimizing demolition and re-construction costs.
- 4 Compact Design**  
The TITAN building is 7' 10" x 12' 9" in size. This small footprint is perfect for any situation where space is a premium.

### : INTERIOR FIT OUT FEATURES
